\*p < 0.05; \*\*p < 0.01; \*\*\* p < 0.001. BF = blockage to forgiveness, SC = sensitivity to circumstances, UF = unconditional forgiveness, FO = forgiveness of others, SF = self-forgiveness, S = perceived stress, PH = perception of health, SL = satisfaction with life; a path = effect of the independent variable on the mediator; b path = effect of the mediator on the dependent variable; c path = effect of the independent variable on the dependent variable while controlling for the mediator; c' path = direct effect of the independent variable on the dependent variable while controlling for the mediator. Effects are adjusted for marital status (i.e., being in a relationship)
